PROFESSIONAL SUMMARY

Result-focused Backend Developer with practical experience building RESTful APIs, authentication systems, and scalable backend logic using Node.js, Express.js, TypeScript, and databases like MongoDB and PostgreSQL. I have contributed to real-world projects, led small engineering teams, and collaborated with product designers and frontend developers to deliver clean, secure, and well-documented backend features. Through internships and project-based training, I have strengthened my understanding of backend architecture, integrated third-party services, and worked within agile, team-based environments. I am now seeking a junior backend developer role where I can contribute to meaningful products, learn from experienced engineers, and continue developing my technical problem-solving skills.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), Node.js, Express.js, TypeScript, HTML5, CSS3
Databases & ORMs: MongoDB, MySQL, Sequelize ORM
Tools & Platforms: Git, GitHub, GitHub Actions, Postman, Render, Vercel, Trello, Redis, Stack
Integrations: Korapay, Paystack
Others: REST API Design, JWT Authentication, Authorization, Error Handling, Version Control, Agile workflow, Rate Limiting

WORK EXPERIENCE

Vendsr (Tech startup empowering SMEs with web solutions for inventory and sales insights) Lagos, Nigeria
Backend Intern/ Team Lead (Remote) May 2025 – November 2025

- Led a backend team of 4 on an e-commerce platform focused on seller verification, product management, and secure transactions.
- Set up GitHub repo and coordinated Trello workflows to manage sprint deliverables and feature branches.
- Developed backend features, including user registration/login, product APIs, and CAC verification using Dojah API.
- Conducted regular code reviews and helped maintain clean backend architecture and documentation.

The Curve Africa by Kora (Training focused on project-based learning and real-world simulations) Lagos, Nigeria
Backend Trainee (On-site) May 2025 – November 2025

- Built RESTful APIs, handled authentication, and improved logic-building skills using Node.js and Express.js. Collaborated on team projects, participated in daily standups, and reviewed code during sprint reviews.
- Honed backend architecture knowledge and clean coding practices through hands-on tasks and peer feedback.
- Collaborated with UI/UX designers and provided API documentation using Swagger for frontend developers.

EDUCATION

Lagos State University (LASU) October 2018 – April 2023
Bachelor of Science (B.Sc.) in Educational Management (Second Class)

PROJECTS

TraceAid – Node.js, Express.js, MongoDB, KoraPay (test mode), Cloudinary. Live Link

- Designed and built secure and scalable RESTful API endpoints for TraceAid, a milestone-based crowdfunding and accountability platform, engineering workflows for user onboarding, KYC verification, campaign and milestone creation, donation management, milestone proof of impact evidence upload, and milestone-based disbursement.
- Integrated KoraPay API in test mode to simulate real-time transaction handling and webhook verification.

- Developed a secure escrow-style fundraising wallet system, ensuring funds are locked until proof of impact from the previous milestone has been uploaded and verified.
- Implemented JWT authentication, role-based access control, and utilised Cloudinary for secure file uploads and storage of milestone impact evidence (images, documents, and videos).
- Designed optimized MongoDB aggregation pipelines powering analytics logic in the donor dashboard, fundraiser dashboard, and admin dashboard.
- Created comprehensive API documentation using Swagger, ensuring clear communication of the API endpoints to the frontend developers.

E-commerce API – Node.js, Express.js, MongoDB.

- Developed a secure RESTful API supporting CRUD e-commerce functionalities, including user accounts, product catalogue management, carts, and order processing.
- Implemented secure JWT authentication and role-based access for customers and admins.
- Integrated server-side validation, error handling, and structured API responses.

CERTIFICATIONS

- Backend Development Certification (Node.js, Express.js, TypeScript, PostgreSQL) – Axia Africa 2024 – 2025
- Certified JavaScript Developer (JavaScript Essentials 1 & 2) – Cisco NetAcad 2024 – 2025
- TypeScript – Mimo 2025 - 2025
- Full Stack Development (HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, SQL) – Mimo 2025 – Present
- Introduction to Google SEO– University of California (Coursera) 2024 - 2024
- Introduction to FinTech – Corporate Finance Institute (CFI) 2024 - 2024
- Computer Hardware & Microsoft Office Tools – Global Tech Institute 2015 - 2016
